GOVERNMENT ADVERTISEMENT.

NOTICE is hereby given, that on the 1st Day of September next, a FLAG-STAFF will be erected on the Lion's Rump, for the purpose of communicating with Ships entering Table Bay, by means of Captain MARRYAT's Code of Signals, now in general Use in the Merchant Service.

Vessels approaching the Land, have, therefore, only to make use of that Code, as directed, for the purpose of either conveying, or receiving, Communications to or from the Signal-Post on the Lion's Rump.

It is to be recollected, that at this Flag-Staff, a Colonial Telegraph is also in use; but no mistake can arise therefrom, if Ships in the Offing pay attention to Captain MARRYAT's Code, the Flags of which are entirely different from those of the Colonial Telegraph.

Cape of Good Hope, 8th Aug. 1821.

By His Excellency's Command,

(Signed,) C. BIRD, Secretary.

GOVERNMENT ADVERTISEMENT.

NOTICE is hereby given, that a LIGHT-HOUSE, with a double Light, is now building, on the projecting Point of Land between the Great Mouilée, or Moulin Battery, and Three Anchor Bay, under the Lion's Rump, at the Entrance of Table Bay. As soon as this Building shall be completed, due Notice thereof will be published in the Cape Gazette, and will be as generally communicated, as possible, by other means.

The following are the Directions, under which Vessels may enter Table Bay, in the dark, after the Light-House shall be completed.

Cape of Good Hope, 28th Sept. 1821.

By His Excellency's Command,

(Signed,) C. BIRD, Sec.

Directions for Sailing into Table Bay, by Night.

Ships coming from the Southward and Westward, with a leading Wind, not having made the Light-House before Night, may steer along the Coast to the N.E. until they open the Lights of the rising Land, about the Lion's Head, when the two Lights will be their breadth open of each

other, and bear about E. by N. ;—they may then haul in towards them, taking care, as they approach, to keep them well open on the Starboard Bow ;—steer to the Eastward, until the Lights come on with each other, i. e. are in one, or until they bear S. W. half S. they will then be abreast of the North-Western Extremity of Table Bay, and may haul in S. by E. or S. S. E. according to circumstances, for the Anchorage;—when the Lights are shutting in by the rising Land of the Upper Mouline Battery, bearing N. W. by W. they will be approaching the outer Anchorage, where they may safely anchor for the Night, in 7 or 8 Fathoms Water, fine Sand. Care should be taken not to run into less than 5½ or 6 Fathoms, unless well acquainted.

Ships coming from the Northward and Westward, should observe the same Directions, with respect to passing the Lights, &c.

Ships working in, with the Wind from the Southward and Eastward, after being abreast of the Lights, should not stand to the Eastward farther than 2½ or 3 Miles, or until they shoal the Water to 8 or 7½ Fathoms.

N.B. The Bearings are all by Compass, Variation 27°. Westerly.

J. GOODRIDGE, Master Attendant,
H. M.'s Naval Establishment.

CAPE OF GOOD HOPE
PORT INSTRUCTIONS.

ARTICLE 1. You are, in the first place directed to take especial care, that in mooring your Vessel, you do not give a foul Birth to any Ship or Vessel, and more particularly so, to those of His Majesty.—If it should be judged necessary to change your Birth, you are to take such as will be pointed out to you by the Captain of the Port; nor are you again to shift it, unless from absolute emergency, in which case you are directed to report to him your having done so.

2. When boarded by the Captain of the Port, or his Deputy, you are, immediately, if required, to shew all your Papers, particularly the Register of your Ship;—to deliver a List of the Passengers, describing their rank, sex, and occupation;—nor are you to suffer any to leave the Ship, until permission is obtained.

3. You are to deliver to the Captain of the Port, or his Deputy, the Public Mail; and, without reserve, all Private Letters, that the same may be regularly transmitted through the Post Office; and to ensure due attention to this and the foregoing Instruction, it is hereby notified to you, that if it shall appear that you have not duly accounted for every Individual, you shall incur a Penalty of 1,000 Rds. for each Person so unaccounted for;—and for every Letter not lodged in His Majesty's Post Office, within twelve Hours after the receipt of this Order, but otherwise delivered or reserved, you shall incur a Penalty of 50 Rds.

4. You are to hoist the Health Flag at the Main Top-Gallant Mast Head, (when ordered,) the Quarantine Flag at the Fore Top-Gallant Mast Head.

5. You are, within twelve Hours after Anchoring, (Weather permitting,) to wait, in Person, upon the Governor, or in his absence, the Lieutenant Governor, and to deliver to him such Newspapers as you have, which will be again returned you; and then immediately proceed to the Colonial Secretary's Office, to the Custom-House, and to the Port Captain's Office, in each of which places, you will receive Instructions relative to the several Duties that are required of you;—and at the former you are to give Bond, with two approved Securities, for duly complying with the Instructions of this Port; and at the Custom House is required your Ship's Register, Manifest of Cargo, &c.

6. Until you have received from the different Offices such Instructions as may be pointed out, and entered into such Securities as may be required of you, you shall on no account land, or suffer to be landed, from your Vessel, any Box or Parcel whatever; and in the event of your doing so, the same shall be liable to Confiscation, as likewise to any Penalty decreed by the Colonial Law.

7. You are not to allow your Boat to board, or run along-side of, for the purpose of communication, any Vessel arriving in this Bay, until she has hoisted the Health Signal.

8. When your Vessel is properly moored with Bower Anchors, or at least with one, and a very heavy Stream Anchor, and good Cables, and Buoys and Buoy-ropes, you are to take the exact Place of the Ship by Bearings of two Landmarks, and Depth of Water; and should any accident occur, by which your Ship may drift from her situation, or lose her Anchors, you must be careful in taking good Bearings at the time, and Depth of Water, and notify the same, in Writing, to the Port Office;—and it is particularly recommended to you, to keep your Ship as snug as possible, to counteract the effect of the Periodical Winds, which sometimes blow with great violence.

9. You are, within twenty-four Hours after giving Security at the Colonial Secretary's Office, to lodge the Certificate of your having done so at the Port Office, and to leave there your Address, or Place of Abode on Shore.

10. No Boat can ship, tranship, or bring on shore, any Goods, Wares, or Merchandize, without a Permit from the Custom-House, which is to particularise the nature and number of Packages, &c. Nor can Boats be permitted to land Goods, (except King's Stores,) any where but at the Public Wharf, without permission from the Custom-House; and when landed, they must be taken away within hours, or they will be liable to seizure.

11. You are not to allow any Deserter from His Majesty's Navy or Army, or any run-away Slaves, to be harboured on board your Vessel, under a Penalty of 500 Rds.

12. You are not to receive or harbour Seamen, or Sea-faring Men, or Landsmen, of any Nation or colour, without a Certificate from the Commanding Officer of His Majesty's Ships or Vessels of War on this Station, with regard to Seamen and Sea-faring Men; and of the Captain of the Port, with regard to Landsmen and others, countersigned by His Majesty's Fiscal; nor receive any Person whatsoever on board, without a due Certificate, under Forfeiture of the Penalty in the Bond signed by you, at the Secretary's Office.

13. You are not to leave any Passenger, or other, behind you in this Colony, without permission from the Colonial Secretary's Office; and all Persons deserting, or absenting themselves from your Ship, are to be notified at the Port and Fiscal's Offices, that they may be apprehended as soon as possible.

14. Your Boats cannot be permitted to remain on Shore after Gun-fire at Night, except in cases when the Public Service requires your Ship to be quickly watered.

15. You must give Noti e, in writing, at the Custom House, at least two Days previous to your sailing from Table Bay, and three Days Notice from Simon's Bay;—and in order to admit of all possible means, and to give sufficient time for researches to be made for Deserters and run-away Slaves, you are to cause your Ship's Ensign to be hoisted at the Main Top-Gallant Mast Head, forty-eight Hours previous to your intended departure, in order thereby to notify it to the Public.

16. In failure of complying with any one of these several Instructions, so enumerated, you will, for such Offence, incur a Penalty of 500 Rds. over and above the other Pains and Penalties as by Law established.

17. As soon as possible after arriving in the Bay, you are to unshot your Guns, and not to shot them again until clear of the Anchorage, under a Penalty of 50 Rds.

18. You are forbid to fire Musquets, &c. on board your Ship, or Boats, in this Anchorage, under a Penalty of 50 Rds.

19. You are likewise to give strict caution to your Crews and Passengers, not to fire Musquets or Pistols in the Town, or on the Beach, within the Batteries:—in so doing, they will incur a Penalty of 20 Rds. for every Shot.

20. All Sailors, Fishermen, and Boatmen, shall, at Nine o'Clock at Night, retire from the Streets, and repair to their Quarters, or their Boats; and should any be found in the Town after that Hour, they will be apprehended and confined, by the Civil or Military Patroles.

21. No Sailor may remain on Shore, without a Pass from His Majesty's Fiscal, or his Deputy;—and the first Under-Sheriff is also authorised to give a Pass, *for One Night, only*, in case of bad weather, or other pressing circumstances.

INSTRUCTIONS

FOR THE

ARTICLE 1. The respective Wardmasters, who, from a number of three, presented by the Burgher Senate, shall have been chosen by the Governor, shall remain permanent, until, after their having served three years, it shall please the Governor to release one or all of them; and each Individual in his Ward, shall pay every regard and respect to the Wardmaster, without insulting, much less reproaching him, on pain of fine and imprisonment.

2. The Wardmasters, in order that their Places of Residence may be known to the Public, shall affix a Board on the outside of their Houses, on which shall be written "*Wardmaster*," and under it, the Number of the Ward; or otherwise, have this Word and Number written on their Door Frames, so that it can be distinctly read from without.

3. The Wardmasters shall keep an exact List, or Register, of the Houses in their Wards, of all the Families and Persons by whom they are inhabited, and their Avocations; also the Strangers who reside therein, to whatsoever Nation they may belong.

4. Upon this List, or Register, the Wardmaster shall notice all those who quit the Ward, as also those who come to reside there;—these Lists shall annually, on the last day of December, be delivered into the Burgher Senate, so that by their Secretary, one General List can be made of them, to be laid before the Governor.

5. In order to enable the Wardmasters punctually to conform hereunto, every Inhabitant shall be obliged, when he leaves a Ward, and also when he goes to reside in another, within the period of ten days after, to acquaint the respective Wardmasters therewith, either personally or otherwise, on pain of being fined 10 Rds. one-half to go to the Town Treasury, the other half at the disposal of the Wardmaster; the Person changing his Ward, shall receive from the Wardmasters, the following Certificates:—

A. B. has acquainted the undersigned Wardmaster, with his leaving the Ward No.

Cape Town, the *C. D. Wardmaster.*

A. B. has acquainted the undersigned Wardmaster, that he is come to reside in the Ward No.

Cape Town, the *C. D. Wardmaster.*

6. Should the Wardmasters be neglectful hereof, they will be fined 60 Rds. to be divided, three quarters to the Town Treasury, and one quarter for His Majesty's Fiscal.

7. Every Inhabitant shall be obliged, immediately, on a Stranger coming to reside with him, to acquaint the Wardmaster therewith, were it for a single night only, and the same when he leaves, on pain of being fined 15 Rds. for every offence, and the Wardmaster shall give a Statement thereof at the Fiscal's Office, whenever required.

8. All this, without detracting from the Laws, which enjoin the Inhabitants to report such Strangers, without any exception, at the Fiscal's Office, within twelve hours after their arrival, which Law is hereby repeated.

9. In order to effect this, the Wardmasters are permitted, with due propriety, to make the necessary enquiries; however, they are not to search the Houses, but on having substantial grounds of suspicion, they shall inform His Majesty's Fiscal thereof, in order to act according to Law.

10. And in case the Wardmasters should entertain any idea of suspicious or dangerous People being in their Ward, they shall inform the Fiscal and the President of the Burgher Senate thereof, so that each, in their respective Departments, may ensure good order, and the security of the Inhabitants.

11. Further, the Wardmasters shall notice the conduct of those residing in their Wards, how they employ themselves, and earn their livelihood; and on observing any, who having no means of subsistence of their own, do not endeavour to procure employment, so as to gain an honest maintenance, the Wardmaster shall give information thereof, as directed in the preceding Article.

12. Wardmasters shall, in like manner, give information the moment they observe, that, either by Day or Night, any suspicious or unusual Conventicles or Meetings take place; or of any Society, Meeting, or Billiard Houses, not duly licenced by Government.

13. Wardmasters shall take care, that no Taps or Eating Houses exist in their Wards, without having proper and distinct Signs affixed; that no Taps remain open after the prescribed Hours; that there are no Gaming, or other Houses, inconsistent with morality and good order; on discovering such, they shall report them to the Fiscal, and to the President of the Burgher Senate.

14. In case of Manslaughter, or any other accident occurring in the Ward, the Wardmaster shall immediately report the same to the Fiscal.

15. And whereas it is of the greatest importance to all the Inhabitants, that the Streets and Roads be kept clean; as also, the Gutters in front of the Houses, by which the Rain-water must find its way into the Canals; each Inhabitant shall, at least twice a Week, viz: Wednesdays and Saturdays, cause the Road or Street, in front of their

Houses, to be cleansed, and the dirt to be swept up in heaps, to be taken away by the Town Scavengers, so as to prevent all infection, and consequent disease; on pain of a Fine of 5 Rds. for the first offence, and 10 Rds. for the second.

16. The foregoing being an essential part of the internal Police, the Wardmasters are hereby made particularly responsible for the execution thereof. Whosoever shall be found to neglect the same, the Wardmaster shall order them, either personally, or in writing, to comply; and in case of continued neglect, this Order shall be repeated by a Messenger of the Burgher Senate, for which he shall be paid four Skillings, by the Person offending; and if still persevered in, the Wardmaster shall then inform the Fiscal thereof, who will, without any Form of Process, immediately compel the refractory, by causing the Streets and Gutters to be cleansed, and the expences so incurred, to be levied upon them by execution, which is to be instantly performed by one of the Officers of Justice, without any further Process. The Fiscal reserving, moreover, his right to proceed in levying the Fine, according to the Placards.

17. In like manner shall the Wardmasters and the Fiscal proceed and act, in case of any one throwing Filth of any kind into the Canals, as being also forbidden by the Placards.

18. The Wardmasters shall also be careful, that the Streets of this Town, particularly the cross Streets, be not encumbered with empty waggons, piles of wood, heaps of rubbish, &c. or with tying unyoked oxen to the waggons, as well as by loading and unloading the waggons, which shall be proceeded against as directed in the 16th and 17th Articles.

19. When, in case of Building, it is unavoidable to encumber part of the Street, such must first be reported at the Fiscal's Office, and made known also to the Wardmaster, who shall take care, that part of the Street only be so occupied, with moderation, and as little inconvenience as possible be occasioned to the Passengers; as soon as the Building is completed, the Committee of the Burgher Senate must be acquainted therewith, who are to see that the Street is restored to its former state; and the Persons to whom the new Building belongs, must take care, that from dark, till day-light, there is a lantern kept burning, to prevent accidents during the night.

20. In case of Fire, or other accidents, the Wardmasters shall constantly remain, and patrole in their respective Wards.

21. To yield, in case of Fire, the greatest and most expeditious assistance, the Wardmasters are to form, and keep in readiness, in their respective Wards, a separate List of the number of Slaves which the Inhabitants of each Ward must furnish for that purpose.

22. In case of Fire, those Inhabitants who live to windward of the place where the Fire is, shall immediately, on its being discovered,

send their Slave or Slaves, so registered, to the House of the Wardmaster, to be sent by him to the Town House, under a Fine of 10 Rds.

23. All the Inhabitants must report to their respective Wardmasters, the Pumps and Wells they have on their Premises, of which they shall keep a List, so as to be able to make use of them, in case of Fire ; the necessary care will be taken that those Houses suffer as little inconvenience as possible, and any damage done to the Pumps or Wells, shall be repaired at the expence of the Town.

24. In consideration of the trouble the Wardmasters experience in the Public Service, they shall be free from paying Capitation Money, the Repairs of the Streets, and the Chimney and Hearth Money, for one House or Warehouse, or for one House and Warehouse thereunto annexed, though not for more than these.

25. And whereas the Office of Wardmaster is absolutely necessary for the internal welfare of the Town, and the tranquillity of the Inhabitants; so it cannot be permitted that any one, legally called upon, shall refuse serving it:—It is hereby declared, that from the nature of the Office of Wardmaster, and the obligation every Individual is under to contribute to the general good, should any one refuse to fill the said Office, he must state his reasons for so doing, in writing, to the Burgher Senate, so that, having obtained the advice of the Fiscal respecting it, the matter may be laid before the Governor.

Should the grounds of refusal be deemed inadmissible by the Burgher Senate, and the Person still refuse, he shall be deprived of all his Privileges, as a Burgher ; and, the Governor approving, be moreover considered as an unwilling and refractory Burgher, and be sent out of the Colony.

The Wardmasters shall take the following Oath, in presence of the Burgher Senate :—

" I do promise and swear, to be true and faithful to His Britannic " Majesty, and his Government at the Cape of Good Hope ;—that, with " all the fidelity and zeal in my power, I shall execute, and cause to be " executed, whatsoever is expressed in my Instructions, and whatsoever " respecting my Office, I may be directed to do ;—and, further, perform " whatever may be required of a good and faithful Wardmaster, without " fear, or reward, or any other consideration.

"SO TRULY HELP ME GOD."

Expected Appearance of a COMET.

The Comet of 1819, is expected to arrive at its next Perihelion about the middle of May, 1822. It will not be seen in Europe in the early part of the Year, because it will then be too faint, in comparison with the Evening twilight. In Southern Latitudes, it will be easily discoverable, as soon as the 9th or 10th of June, of the brightness of a Star of the fifth magnitude. In the beginning of July, it will be brighter than a Star of the fourth magnitude; and, afterwards, gradually diminish in brightness, till it becomes invisible.

SEASONS of the YEAR.

December, January, February,	Winter.	June, July, August,	Winter
March, April, May,	Spring.	September, October, November,	Spring.

September, October, November,	Autumn.	March, April, May,	Autumn.

JANUARY, second Summer Month.

Cabbage must be planted in a moist soil; also French Beans, Turnips, Radishes, Celery, Leeks, and black Radishes sown: the brown Lettuce to be transplanted, late Cucumbers laid; if these do not set well, they should be topped.—Cauliflower to be transplanted in a dry soil; Cauliflower Seed sown for an after crop.

The above-mentioned Vegetables must be well watered, until they grow.

This is the hottest month, and the South East wind most powerful; occasionally there may be some rain: the Cabbages must be planted in moist land: Turkey Beans are to be planted 1½ inch deep.

The grafted Trees, which begin to shoot, must be pruned, and cut off one inch above the graft.—The Vineyard should be diligently watched, to prevent the Birds from injuring it.

This and the succeeding month, is the best season for cutting Rushes for thatching, because they are then in their full growth; they should be tied in bundles, and carried off the land: this is also the month for burning the fields.

The Rams should be put to the Ewes, for the Lambs to drop in the months of May, June, and July, when there will be grass for them, and the Ewes be able to keep up their milk; for it has been observed, that if they come in later, in a dry season, both Ewes and Lambs have died by hundreds for want of grass.

He who is obliged to thatch on his Place, and lives at a distance from the grazing grounds, will do well to sow Rye, in a sandy, well manured, soil; he will have the grain for bread, the straw for thatching, and he will not be obliged to tire his cattle by long journies.

FEBRUARY, third & last Summer Month.

Turnips, Radishes, Dutch Cabbage, Salad in moist land; Carrots and Parsnips, to be sown in dry land; must be watered in the evening.—Cabbage and Cauliflower in a dry soil; Celery, Leeks, French Beans, brown Lettuce, and Endive, must be sown and transplanted into moist land.

The South East wind blows hard this month; but now and then a gentle rain refreshes the soil: Turkey Beans planted in October, November, and December, are now ripe.

Melons and Water Melons begin to ripen. Care should now be taken that the birds do not destroy the Grapes that are ripe.

23d Feb.—Carrot seed now sown, does well; it is best to sow it with a declining Moon, as also most of the small Herbs. Pease and Turkey Beans can be sown with a growing Moon, so as to make them run well in November

During the whole of this month, the Corn must be weeded. Turnips sown this month remain during the whole of the rainy season, and even until October, without running to seed;—the field may still be burnt, but it is late.

The Branches and small Leaves of the Sumak, or Taaybosch, (small kind,) properly bruised, are much superior to the Bark of Oak Trees, for tanning; therefore the planting of which is highly recommended.

MARCH, first Autumn Month.

To have early green Barley for Forage, it should be sown during this month, on well manured land.

If the Plough cannot work, then the seed sown upon the manure should be covered in with the spade or mattock. During this month, either with a growing or declining Moon, Dutch Cabbage seed should be sown in a moist soil, to be transplanted in the month of May; about the full Moon, early Chervil, Parsley, Spinage, white Beet, red and white Salad, Carrots, all in moist land; Beans, Pease, Salad, Celery, Leeks, and Sugar Pease, planted to have an early crop.

European Cabbage seed sown and transplanted now, comes to good head in October. Sow Turnips in a good dry soil. Transplant Lettuces. March and April are the best months to destroy the couch grass in the Vineyards. Melons and Water Melons are now ripe.

Now is the season for gathering the Grapes and making Wine.

Experience shows, that the scab in Orange Trees is occasioned by a want of water and of manure; it is, therefore, adviseable to open the ground about the stem of all sorts of Orange Trees, to clean away the thin fibry roots, and to lay on a coat of cow dung.

It must not be omitted to prune the Trees, and to cut out the dead wood.—The Farmer now is busy in keeping his Corn clean; if there is any land still to be broken up, choose a fine hot day.

Lemon, Citron, and Orange Trees ought to be planted at least 25 feet apart, and from all other Trees or Plants, in a very good soil, which should be annually manured, and the ground well dug; otherwise the Trees growing from the seed, die, while their roots spread themselves in the ground: when they stand too close together, they rob each other of nourishment, and die, or get what is called the scab.

APRIL, second Autumn Month.

To have large Onions, they ought to be sown in this month on new and well manured land; in dry weather they must be watered.

White Salad, early Carrots, Turnips, Spinage, Radishes, Mustard, Chervil, Onions, European Savoy Cabbage, red Cabbage, Lentil, Beans, Pease, and Potatoes, are now sown.

To have Cauliflowers out of season, the seed should be sown from the middle of April till the beginning of May, in rich land; when transplanted in June and July, they come to head in August and September.

The violence of the South East wind begins to moderate: if there is rain, small herbs may be sown; likewise Salad, Parsley, Beet, Spinage, and Chervil.

Apples, Pears, Melons, and Lemons, are now ripe.

Ditches and Ponds must now be opened: during this month all the Corn should be thrashed out, or it must be kept over.

The land must now be dunged at the rate of 40 loads per morgen; and, if possible, ploughed.

MAY, third and last Autumn Month.

Cauliflower, Dutch Cabbage, red and white Salad, sown in March, can now be transplanted, about the full Moon.

Sugar and other Pease to be planted in a dry soil; when broad Beans and red Beans begin to blow, they must be topped.—Carrots, Turnips, Onions, Salad, Parsley, Aniseed, Coriander, Spinage, Pease, and Beans, should be sown about the full Moon; with a declining Moon, Onions, Radishes, Endive, Carrots, and Parsnips, should be transplanted for seed.

Before the Carrots are transplanted for seed, they should, after being pulled up, be spread in a loft, and kept there a fortnight or three weeks.

The best seed of the Cabbage is that which shoots out from the sides, and not from the centre.

Apples, Pears, Quinces, &c. are now quite ripe.

Small herbs, Carrots, Turnips, Onions, Radishes, black Radish, Lettuce, Endive, and Cabbage, are to be sown about the decline of the Moon, and transplanted in moist weather.

The seed of the Keurboom sown at this season, thrives well.

The land must be ploughed and sown this month, although there may be no rain.

This is the Calving and Yeaning Season.

It is thought, that when the honey dew touches the Corn, unless there is rain within 2 or 3 days after, the ears turn black, and the grain is injured.

JUNE, first Winter Month.

In this month it is customary to prune the Vines, and to clear away the hairy roots; they should be manured every two years: experience, however, has taught, that to lay the manure round the stalk, is by no means adviseable, as it produces insects that are extremely injurious to the Vine; it is best to spread the manure over the land.——European Cabbage, Savoy, and red Cabbage, must be transplanted into good dry ground. Sow Carrots. To have good Tulips, the land should be well manured, and the holes into which the bulbs are to be placed, must be half filled with white river sand.

This month the weather is generally fine, and consequently proper for sowing both in the field and in the gardens.

Almond Trees transplanted at this time, grow well.

This is the most favorable season for transplanting Trees, particularly the natural Trees of the country; it should be done in rainy weather: the South East wind is seldom felt; the North and North West winds prevail. This is the time for taking up Potatoes Sow Chinese Figs, plant Jonquil bulbs, transplant Strawberries, plant Almond Nuts, the point downwards, also Chesnuts, Walnuts and Hazelnuts.——Acorns should be gathered when ripe, and immediately planted; those that drop off are dry, and therefore not good for planting. If land, on which it is intended to plant Trees, is not fit for it, holes should be dug, into which two or three green boughs must be put, covered up with rich mould, and the Trees planted therein.

The calving and yeaning season continues.

Orange Trees, of which the stem is attacked with the scab, must be cut down to the ground; if the branches only are attacked, they should be cut out.

Lemon Trees require a moist soil, free from Saltpetre.

JULY, second Winter Month.

About the full Moon sow Cape Cabbage, to be transplanted in September.—All sorts of Vegetables must be planted this Month for Seed—plant Pease, Beans, Pumpkins, and Calabash. In this, and the next Month, dig the Vineyards.

It is now the proper Season to transplant and to graft Fruit Trees. About the end of the Month sow European Celery; and, when the Moon declines, sow Cauliflower, Savoy, red and other Cabbages.

Plant Potatoes in well-manured Land. If the eyes have shot, each eye should be taken separately, and so planted.

When a Vineyard is intended to be planted, it is best to dig the Ground to the depth of 3 feet, and clear it of stones and weeds, and immediately after the shoots are cut, tie them into bundles of a hundred each, and so bury them, until the end of September, or the beginning of October, when they are to be taken up, and planted in moist weather; though they will have shot while under Ground, those leaves fall off, and new ones bud out.

This is still a proper season for transplanting Foreign and Native Forest Trees.

Sow likewise Cabbages, Lettuce, Turnips, &c. Apples, Pears, Almonds, Peaches, Apricots, Figs, &c. grow well in low Land.

To have late Barley, the Land must now be prepared.

Prune old Vine Stalks early this Month: new Vine Stalks may be planted in the place of those that have been removed. The Vine Stalks or Sets intended to be planted, must be 14 or 15 inches in length, and have at least 2 or 3 buds; those that have been slipped or torn off from the Stalk are the best; they should be planted regularly in a S. E. or N. W. direction. It has happened, that a Vine set has borne Fruit the same Year of its being planted, and that 800 old Stalks have yielded 3 Leaguers of good red Wine. It has also happened, that a small bough of an Apple Tree, being put into the Ground, has borne Fruit the following Year.

When a Vine Stalk has died, it should not be replaced by a new set; for, the old Stalks having full possession of the Ground, would draw all the nourishment from the new one, and prevent its growing; but a hole, of about a foot deep, should be dug close to the nearest Stalk, a Branch of the same laid down, and thus covered, that only a couple of inches of it appears. When it is found to grow, then, the Year following, it should be cut half through, close to the Mother Stalk; the second Year it should be cut off quite.

If any one wishes to have Vines to run up by the side of Trees, they should be planted at the same time, and close together

AUGUST, third and last Winter Month.

Dig up the Vineyards. In this month Dutch Cabbage, Cauliflower, and red Cabbage come in.

With a declining Moon, sow Cape Cabbage, Celery, Leeks, Parsley, Turnips, Chervil, Carrots, Parsnips, red Beet, and early Cucumber seed.—To prepare the land for early Cucumbers, after its having been dug, and dressed with horse dung, and being divided into rows, the seed should be sown in them. When the Cucumbers do not set well, the runners should be topped.

To have Cauliflowers out of season, the ground should be well dug and dunged; sow the seed singly at proper distances, and let the plants grow without transplanting.—When the heads are forming, the outer leaves should be tied over them, so as to prevent the Sun from drying them up.

Celery is best sown in this month, so as to be planted out in trenches, well supplied with water, in November and December.

Fruit Trees should be grafted a day after the full Moon; they will bear the year following.—Towards the end of this month, plant Vine sets.—The land intended for a new Vineyard, should be prepared, and the old Vineyards, cleaned.

About the middle of this month, Orange, Lemon, as also other European Trees, should be grafted; about the same time the Almond Trees begin to get into blossom, being the first Trees that blow: about the beginning of the month, the Vines begin to bud.

Speck Trees grow well in fresh ground: transplant Guava Trees, Catsmint, Parsley, Pempernel, Leeks, Sorrel, and African Anise Roots; also Cabbages for seed, Artichokes, Turnips, Carrots, Parsnips, and Beetroot.

Dams and Ditches must now be attended to.—This is the season to set Brooding Hens, Ducks, and Geese.

SEPTEMBER, first Spring Month.

About the full Moon, plant Onions, Beans, Water Melons, Melons, Pumpkins, Calabas, Cucumbers, Celery, early Cabbage, Leeks, Potatoes, Sugar Pease, Beans.—Sow Celery, Cabbage, Carrots, Salad, Parsley, Spinage, and Beetroot.—This is the best time for putting small herbs into the ground; also French Beans: be particular to use tolerably moist land.—White Beans to be sown in the field.

Moist good land should be well ploughed and dragged in June and July; and then let it lie till the middle of September, when it must be properly dunged and ploughed, in order to be sown towards the end of the month.

When the Beans are seen to turn somewhat blue, they must be well watered; but when they begin to grow, let them be left to ripen without water: the same method must be pursued to get late Pease.

The land may be used for two years; but the third year it is absolutely necessary to sow Barley or other Corn upon it; otherwise it gets too much overrun with couch.

Asparagus beds.—Dig a trench, well supplied with water; raise heaps similar to mole heaps, a foot apart, and put the plants, 2 or 3 years old, into them; when they are dry, let them be well watered.

Indian seeds must be sown towards the end of this month.

African Almonds sown in July begin to come up. Plant Vines and Asparagus.—Dig up wild African Asparagus, to be put into new land.

Forage ——

OCTOBER, second Spring Month.

Sow Cape Cabbage seed, Tarragon, Carrots, Cauliflower, white Salad seed, brown ditto, Beetroot, Parsley, Radishes, and Turnips.—Plant Cabbage, Beans, Celery, Onions, Potatoes, all in moist land.

Plant Pumpkins, Melons, and Water Melons, in ground that has been dug 2 spades deep.

Now and then there falls some rain: the Garden should be sown; the Vineyard kept clean; and if it grows too rank, let the shoots be topped, and the ground be hoed.

Now is the most busy time for the Farmer; Barley and Oats must be harvested.

Potatoes intended to be kept, must be put into heaps, covered with earth about three feet high, and left there until the planting season; the Potatoes require a black mould, well manured.

NOVEMBER, third & last Spring Month.

Sow Endive, Lettuces, Cabbage, Turnips, and Carrots.—Plant French Beans and Pease; Celery, Beans, Cabbage, Cucumbers, and Potatoes, with full Moon.—If the Cucumbers do not bear, they should be topped: transplant Celery shortly after the full Moon.

To gather small Cucumbers, the seed should be planted about the full Moon, in the months of October, November, and December; let the water run between the rows by night, only, when wanted; when they begin to bear, top them, and gather every three days.

Now the South East wind begins to prevail, and there falls but little rain: Locusts and Grasshoppers do much damage.—Prepare the land for Cabbages: sow Cauliflower seed; it requires a rich soil.

The Vineyard must now be attended to, and the long shoots tied up.

Put the Ceylon Bulbs into the ground.—Plant Melons and Water Melons: sow Beetroot seed; also broad Beans.

Burn the fields.

DECEMBER, first Summer Month.

The weather is nearly the same during this month, as in the preceding; but the heat is greater.

Sow Turnips, Carrots, Celery, Parsley, Cabbage, Spinage.—Plant Cauliflower, for an early crop, Beans, Pease, Celery, and Potatoes.

Orange, Lemon, Apple, Pear, Peach, Plumb, Pomegranate, and other Trees, are now grafted.

No strong Vinegar can be made of sulphured Wine.

Ovens should be built with clay, as it resists the fire longer than lime.
